EDUCATION

BCS in Computer Science
Carleton University
Honours in Game Development

LINKS

GitHub: AngelOnFira
Gitlab: AngelOnFira
LinkedIn: forest-anderson

SKILLS

Development Skills: Rust • Python
• C# • JavaScript • TypeScript •
OOP • MVC • RESTful APIs

Databases: PostgreSQL • MySQL •
MongoDB • ClickHouse • Redis

Deployment Techniques: Docker,
Kubernetes, Nomad, Terraform,
GitHub Actions, Nix

VOLUNTEER

GitHub Campus Expert
Field Day Co-Lead 2021 - 2024

RustLang Gamedev Working Group
Team Lead 2020 - 2024

RustLang CTCFT Working Group
Member 2020 - 2022

HashiCorp Ambassador
Community Ambassador 2021 - 2022

Carleton Computer Science Society
Various Roles Sept 2015 - May 2022

TALKS

GitHub Universe '22 Codespaces in
Education with David J. Malan

HackCon '22 The Programmer's
Brain Workshop

CUSEC '22 Leveling Up Game
Development with Rust

Rust in Arts '21 Director's
Commentary: Veloren

EXPERIENCE

Recall.ai Jan 2025 - Jun 2025 | Bay Area, CA / Remote
Software Engineer

- Re-architected meeting bot join flow for a large provider, **reducing compute resource requirements by 99%**
- **Eliminated ~90% of meeting bot crashes** by resolving critical upstream SDK/chromium integration issues
- Managed **microservice** lifecycles within **Kubernetes**, and scaled AWS resources to meet service demand
- Collaborated with 5+ key clients to troubleshoot issues, and translate needs into engineering priorities
- Spearheaded improvements to ad-hoc bot capacity management by implementing real-time monitoring systems, **reducing customer-impacting failures by 80%** and improving system stability under heavy load

Rivet Dec 2023 - Sept 2024 | Bay Area, CA / Remote
Founding Engineer

- Developed **Godot & Unity C#** plugins for Rivet API integration, onboarding docs, and runnable examples
- Managed and deployed services in **Terraform** to deploy across enterprise and open source clusters
- Implemented server log retrieval with **Vector** pipelines, **ClickHouse** storage, and live streaming **RESTful APIs**
- Responded on-call to infrastructure downtime and incident remediation across production clusters

Awetza Nov 2019 - Dec 2024 | Alberta / Remote
Lead Backend Developer

- Migrated bare-metal **Virtual Machines** to **Docker** containers orchestrated with **Kubernetes**, reducing compute requirements by 5x and improving deployment consistency
- Met directly with clients to gather requirements and developed full-stack features with **Angular** and **Django**
- Managed a contract developer within an agile workflow through code reviews and sprint planning
- Prototyped and implemented a new **Rust** backend service, including migration of existing client data to a redesigned **PostgreSQL** database schema

Timsle Jul 2018 - Apr 2020 | Ottawa, ON
Co-Founder

- Led backend development in **Django** with **MySQL**, supporting feature evolution across 4 public-sector clients
- Built **CI/CD** pipelines (**Jenkins**, **GitHub Actions**) automating **unit testing** and production deployments
- Re-architected production infrastructure by containerizing services and migrating from **Heroku to AWS**
- Met directly with public-sector partners to gather requirements and translate needs into product features
