SKILLS

Development Skills: Rust • Python
• C# • JavaScript • TypeScript •
OOP • MVC • RESTful APIs

Databases: PostgreSQL • MySQL •
MongoDB • ClickHouse • Redis

Technologies: Docker • Kubernetes
• AWS • Digital Ocean • Hetzner •
GitHub Actions • GitlabCI • Nix

Frameworks: Django • Axum

VOLUNTEER

GitHub Campus Expert
Field Day Co-Lead 2021 - 2024

RustLang Gamedev Working Group
Team Lead 2020 - 2024

RustLang CTCFT Working Group
Member 2020 - 2022

HashiCorp Ambassador
Community Ambassador 2021 - 2022

Carleton Computer Science Society
Various Roles Sept 2015 - May 2022

TALKS

GitHub Universe '22 *Codespaces in
Education with David J. Malan*

HackCon '22 *The Programmer's
Brain Workshop*

CUSEC '22 *Leveling Up Game
Development with Rust*

Rust in Arts '21 *Director's
Commentary: Veloren*

EXPERIENCE

Awetza Nov 2019 – Dec 2024 | Alberta / Remote
Lead Backend Developer

- Migrated bare-metal **Virtual Machines** to **Docker** containers orchestrated with **Kubernetes**, reducing compute requirements by 5x and improving deployment consistency
- Met directly with clients to gather requirements and developed full-stack features with **Angular** and **Django**
- Managed a contract developer within an agile workflow through code reviews and sprint planning
- Prototyped and implemented a new **Rust** backend service, including migration of existing client data to a redesigned **PostgreSQL** database schema

Veloren Jan 2019 - 2023 | Remote
Meta Team Lead, Core Developer

- Re-designed **Gitlab CI/CD** pipeline to use **Docker** images and optimize **Rust** builds
- Managed migrations through several servers as the project grew in popularity, seeing over **300+** concurrent players on a single server
- Edited a weekly blog detailing recent project advancements
- Hosted weekly meetings with contributors to discuss progress
- Spoke at **CUSEC 2020**, **MiniDebConf 2 2020**, and **Rust in Arts 2021**

Timsle Jul 2018 – Apr 2020 | Ottawa, ON
Co-Founder

- Led backend development in **Django** with **MySQL**, supporting feature evolution across 4 public-sector clients
- Built **CI/CD** pipelines (**Jenkins**, **GitHub Actions**) automating **unit testing** and production deployments
- Re-architected production infrastructure by containerizing services and migrating from **Heroku to AWS**
- Met directly with public-sector partners to gather requirements and translate needs into product features

PUBLICATIONS

L. Doyle, F. Anderson, E. Choy, D. Mould. **Automated pebble mosaic stylization of images**. Computational Visual Media, 5:33-44, 2019.
