EXPERIENCE

Recall.ai

Jan 2025 - Jun 2025 | Bay Area, CA / Remote

Software Engineer

- Re-architected meeting bot join flow for a large provider, **reducing compute resource requirements by 99%**
- **Eliminated ~90% of meeting bot crashes** by resolving critical upstream SDK/chromium integration issues
- Managed **microservice** lifecycles within **Kubernetes**, and scaled AWS resources to meet service demand
- Collaborated with 5+ key clients to troubleshoot issues, and translate needs into engineering priorities
- Spearheaded improvements to ad-hoc bot capacity management by implementing real-time monitoring systems, **reducing customer-impacting failures by 80%** and improving system stability under heavy load

Rivet

Dec 2023 - Sept 2024 | Bay Area, CA / Remote

Founding Engineer

- Developed **Godot & Unity C#** plugins for Rivet API integration, onboarding docs, and runnable examples
- Managed and deployed services in **Terraform** to deploy across enterprise and open source clusters
- Implemented server log retrieval with **Vector** pipelines, **ClickHouse** storage, and live streaming **RESTful APIs**
- Responded on-call to infrastructure downtime and incident remediation across production clusters

Awetza

Nov 2019 - Dec 2024 | Alberta / Remote

Lead Backend Developer

- Migrated bare-metal **Virtual Machines** to **Docker** containers orchestrated with **Kubernetes**, reducing compute requirements by 5x and improving deployment consistency
- Maintained and upgraded a legacy **Django** application across multiple Python and Django
- Met directly with clients to gather requirements, translate business needs into technical designs, and deliver full-stack features in collaboration with **Angular** and **Django** developers
- Mentored and managed a contract developer through code reviews and pair programming, improving code quality and supporting onboarding across the codebase

Timsle

Jul 2018 - Apr 2020 | Ottawa, ON

Co-Founder

- Led backend development in **Django** with **MySQL**, supporting feature evolution across 4 public-sector clients
- Built **CI/CD** pipelines (**Jenkins**, **GitHub Actions**) automating **unit testing** and production deployments
- Re-architected production infrastructure by containerizing services and migrating from **Heroku to AWS**
- Met directly with public-sector partners to gather requirements and translate needs into product features

EDUCATION

Carleton University, Ottawa — *BCS in Computer Science; Honours in Game Development*

SKILLS

Development Skills: Rust • Python • C# • JavaScript • TypeScript • OOP • MVC • RESTful APIs • Microservices
Databases: PostgreSQL • MySQL • MongoDB • ClickHouse • Redis
Deployment Techniques: Docker, Kubernetes, Nomad, Terraform, GitHub Actions, Nix

TALKS

GitHub Universe '22 — Codespaces in Education with David J. Malan | **HackCon '22** — The Programmer's Brain Workshop
CUSEC '22 — Leveling Up Game Development with Rust | **Rust in Arts '21** — Director's Commentary: Veloren
HashiTalks: Deploy '21 — Nomad for Students | **Minidebconf '20** — Community Game Development in Rust: A Biopsy
